Sutton Grammar School

The Coldest Journey Club

* As a student who really enjoys science, when I found out about The Coldest Journey Club, I was naturally excited and wanted to find out more. I am particularly interested in Biology and Chemistry so I look forward to working with staff members and other pupils on the projects regarding those subjects. I also enjoy working on interesting and contemporary problems so carrying out experiments that are really being carried out by real scientists at the moment is really exciting and I cannot wait to get started! (Oh and the coldest I have ever been is -12 in Obertauern – a skiing resort in Austria, it was too cold even to ski!)

*Tom Stuart
